Quick and Easy Access to ... You
Whenever and Wherever Required

OneApp
Safeguarding

**OneApp
Safeguarding**

OneApp Safeguarding

OneApp Safeguarding will enable all organisations, governing bodies, companies, associations, etc to present their safeguarding information for quick and easy access by their community whenever and wherever it may be required.

As well as the ability for proactive messaging via push notifications; provide protected access to individualised content and pdf documentation; present worker identification and biographies; and (soon) provide in-app bespoke self-assessment capability.

Rationale

Safeguarding is, rightly, high in the public awareness. But it is difficult for an organisation to make all its information and updates available to its community … short of publishing booklets or presenting pdf documents online, along with writing blogs and sending newsletters.

The OneApp system is very good for presenting lots of information in a format that is easy to locate and easy to consume.

As much content as is required can be structured so that, within a couple of scrolls and taps, the user can access what they need.

Beyond presenting static Safeguarding information, OneApp will enable content updates to be made and proactive messaging (via push notification) as often as is required.

Whether for a weekly safeguarding report or digest; to comment on or call attention to topical events; or just to reinforce core values and practices, delivery through the App enables ease of use and frequency of engagement.

Affordable

OneApp is built on a common technical framework which means that the expensive aspects have already been put in place … all you need to do is think about the information that you want to present and how it should be structured.

Your price will depend on the delivery option that you choose, but the range will be from £25 - £75 per month depending on organisation size (plus vat); there's a small fee for set-up as well, but that would also be determined by the size of the organisation and the nature of the content.

And that's it.

There are no limits to the number of people downloading or using your App; subscriptions are on an annual basis and payments taken via direct debit each month.

Content Management

To start with, we will manage your content – for both the initial build and ongoing input as required, including content updates and proactive messaging.
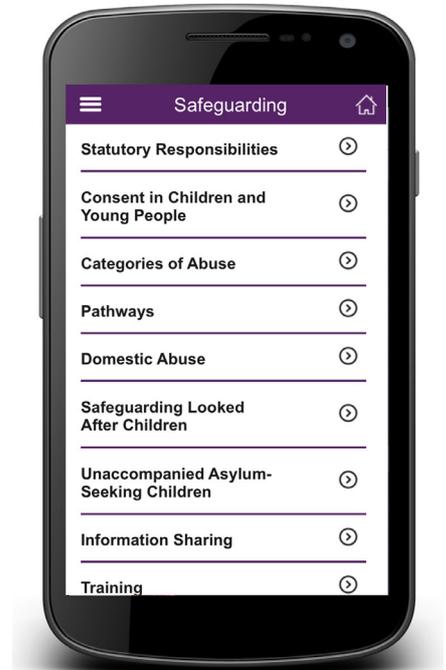

From the summer, you will have your own account within OneApp so will be able to manage all your content yourself.

Presentation on OneApp

The OneApp system currently enables multiple clients to present their content through the single app.

Users simply enter provided login credentials to access their account.

From the Summer, we are adapting the OneApp system so that each account will effectively be its own 'App' within OneApp Safeguarding, with simpler user access.
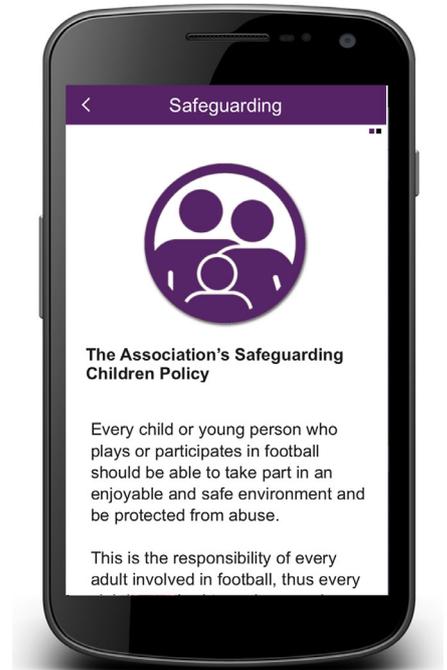

Or … Your Own Individual App

Where the OneApp Safeguarding concept is being explored from the perspective of bringing Safeguarding into the one place for all, it may be that there is wider need within your organisation to present information and proactively message across a number of departments or themes.

In such case, OneApp can be set up for the organisation … with all the same features, benefits and capabilities as described.

While still remaining affordable. Current fees are £125 per month (plus vat) … though initial set-up and submission would be determined individually.

To Get Started …

One. Introductions. Let's start by having a chat … either on the phone or we can meet up.

Two. Experience. Download OneApp G6 (iPhone, iPad or Android phone) and login with the following credentials: username …. **safe@one-app.uk**   password … **safe**

This shows the safeguarding information and communications as received in our capacity of Child Welfare Officer within grassroots football.

Three. Confirm. Great. You love it and can't wait to get started. You'll just need to decide whether to be presented within OneApp Safeguarding or to have your own branded App.

Four. Delivery. We'll get to work … it shouldn't take long.

Five. Announce. Once everything is ready, you can announce the App to your community and encourage them to download.

Six. Make a Difference. That's what we're aiming for – we're looking forward to achieving some really great things together.
